Finance Workshop

Understanding new Fiscal Reporting is a must!

Education finance data provide powerful information for decision-making, policymaking, and evaluation within and across education systems. Uses can be far-ranging from state and national comparisons to individual school level management of resources.

The last of the mentioned uses looms as a major new challenge to school boards in Louisiana. Tracking Title I, IDEA or Career Diploma spending to the building or classroom level is being demanded by appropriation authority. It can be done, but how one gets it done and the value of such a new tool in managing district finance needs to be the focus of careful evaluation. A too shallow or artificial and formulaic report can do more harm than good.

A panel of experts will open the second presentation of the LSBA Finance Trailblazer with presentations on school board responsibilities in a more MFP-transparent environment.
